ABOUT ME

I focus on building solutions with a strong product orientation, prioritizing user experience and real user needs. I have experience in e-commerce, API integrations, and managing complex application state.

EXPERIENCE

Full Stack Developer

Plant

Argentina

2022 - Present

- Rebuilt the mobile application using Expo, scaling it to over 1,000 monthly active users by implementing push notifications, over-the-air (OTA) updates, authentication, and other core features.
- Improved organic SEO using Next.js by adding descriptive meta tags such as Open Graph to help Google crawlers index the site more effectively. Implemented a server-side rendering (SSR) strategy to ensure a complete response on the first render.

SKILLS

Skills: Typescript, Javascript, HTML, CSS, NodeJS, React, Next.js, React Native, SQL, MongoDB, Vitest, React Query, Zustand

PROJECTS

Adobe Design System Clone

2019

A modern, scalable, and type-safe component library built for speed and consistency. The design is inspired by a Figma Community project that replicates Adobe Spectrum v2 using modern frontend tooling.

EDUCATION

National University of La Matanza, Argentina

Software Engineering
